# How to register charter movements

## First Example:
Flight from LSZF - LSZG - LSZF

**Every departure and every arrival needs a movement entry in Flying Fleet.**

**1) Departure LSZF**
Destination          LSZG

**2) External Arrival LSZG**
Starting              LSZF
Destination          LSZG

**3) External Departure**
Starting              LSZG
Destination          LSZF

**4) Arrival          LSZF**
Starting              LSZG

**Note:** All those steps require a new movement within Flying Fleet, however if correctly done, the formulars are mostly pre-filled for you on every step.

## Second Example:
Circuits at LSZF

**1) Circuits**
Edit only the start time

**2) At the end**
- Logbook
- Edit entry
- Change end counter

**Note:** This can be split into a departure and an arrival.
